Key Overview

Graduate of the University of Maryland Physics department with a minor in sustainability. Previously researched supersymmetry with Dr. S. James Gates with a paper in the peer-review process. Currently working for the JQI under Dr. Hafezi researching topological photonics. Seeking an outstanding graduate program in the physical sciences to conduct research on topological photonics in synthetic dimensions with applicable computer simulation and analysis.

SKILLS

- Logical reasoning, data analysis, creative problem solving, project management and planning
- Experienced in Python, Matlab, Ansys Lumerical, Comsol Multiphysics
- Italian, Spanish - Conversational fluency

EXPERIENCE

Joint Quantum Institute (JQI), College Park - *Scientific Researcher*

JUNE 2023 - FEB 2024

- Under Dr. Mohammed Hafezi; designed, executed, and analyzed simulations related to topological photonics and light-matter interactions

Supersymmetry Theoretical Research, College Park - *Scientific Researcher*

JUNE 2022 - Present

- Accepted into SSTPRS Theoretical **REU** with physicist Dr. S. James Gates Jr.
- **50-page publication:** Cianciara, Aleksander J. et al. "Unfolded Adinkra Properties of Supermultiplets (I)." (2023). <https://arxiv.org/abs/2311.06842>

EDUCATION

University of Maryland, College Park - *Bachelor of Science*

SEPT 2020 - MAY 2024

- Major: Physics (**Departmental Honors**) Minor: Sustainability
- GPA: 3.59 on a 4.0 scale
- Teaching Assistant: PHYS105 (Fall 2022), PHYS132 (Spring 2023)
- College Park Global Scholar: Science and Global Change (Living-Learning Program)
- Physics-in-Florence - *Spring 2022*

AWARDS AND HONORS

- ❖ **Eagle Scout** - March 2019
- ❖ **3rd Place** in the Northrop Grumman Mission Systems Innovation Challenge 2021 (ML, object tracking/identification)
- ❖ Angelo Bardasis Memorial Scholarship **Recipient**
